

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings of claims in the application.

Listing of Claims:

1-8. (Canceled)

9. (Previously Presented) A method for receiving a program by a user location that is sent from a remote provider, the method comprising steps of:

determining if any of a first segment of each of a plurality of programs sent from the content provider are not already stored;

recording any first segment of each of the plurality of programs that are not already stored, wherein determining if any first segment of the plurality of programs are not already stored and recording any first segment that is not already stored are performed before any user request for any of the plurality of programs;

detecting the user request for one of the plurality of programs; and

recording a second segment of the one of the plurality of programs in response to the detecting step.

10. (Original) The method for receiving the program by the user location that is sent from the remote provider as recited in claim 9, further comprising a step of recording any remaining segments of the one of the plurality of programs.

11. (Previously Presented) The method for receiving the program by the user location that is sent from the remote provider as recited in claim 9, wherein the first segment is sent on a first digital channel and the second segment is sent on a second digital channel.

12. (Original) The method for receiving the program by the user location that is sent from the remote provider as recited in claim 9, wherein the first segment and the second segment are on different transponders.

13. (Original) The method for receiving the program by the user location that is sent from the remote provider as recited in claim 9, further comprising a step of playing the one of the plurality of programs.

14. (Original) The method for receiving the program by the user location that is sent from the remote provider as recited in claim 9, wherein the detecting step comprises steps of:
receiving a wireless request from a remote control; and
processing the wireless request to determine a desired program.

15. (Original) The method for receiving the program by the user location that is sent from the remote provider as recited in claim 9, wherein the first listed recording step comprises a step of recording the first segment on a mass storage device associated with a set top box that is proximate to the user location.

16-18. (Canceled)

19. (Previously Presented) A method for receiving a program by a user location that is sent from a content provider, the method comprising steps of:
recording a first segment of all of a plurality of programs sent from the content provider before any user request for the program;
detecting the user request for a selected program of the plurality of programs; and
recording a second segment of the selected program if the user request is detected before a stagger period expires, wherein the stagger period is less than a duration of the program.

20. (Original) The method for receiving the program by the user location that is sent from the content provider as recited in claim 19, wherein the detecting step comprises a step of detecting the user request for the program during the step of recording the first segment.

21. (Original) The method for receiving the program by the user location that is sent from the content provider as recited in claim 19, wherein the recording steps comprise a step of recording on a rotating disk at the user location.

22. (Previously Presented) The method of claim 9, wherein the first segment of each of the plurality of programs is sent from the content provider once.

23. (Previously Presented) The method of claim 22, wherein the first segment of each of the plurality of programs are sent from the content provider on the same channel.

24. (Previously Presented) The method of claim 23, wherein the second segment of the one of the plurality of programs is sent from the content provider more than once and on more than one channel.

25. (Previously Presented) The method of claim 19, wherein the first segment of each of the plurality of programs is sent from the content provider once.

26. (Previously Presented) The method of claim 25, wherein the first segment of each of the plurality of programs are sent from the content provider on the same channel.

27. (Previously Presented) The method of claim 26, wherein the second segment of the selected program is sent from the content provider more than once and on more than one channel.

28. (Previously Presented) The method of claim 11, wherein the second digital channel does not send the first segment.

29. (Previously Presented) The method of claim 28, wherein the first digital channel does not send the second segment.

30. (Previously Presented) The method of claim 9, wherein the first segment is sent only once.

31. (Previously Presented) The method of claim 9, wherein the first segment is sent via a first delivery mechanism and the second segment is sent via a second delivery mechanism.

32. (Previously Presented) The method of claim 31, wherein the first delivery mechanism comprises a cable television network and the second delivery mechanism comprises a broadband network connection.
